Applicant: Jason Carson						

Description: *Construct a reinforced concrete slab measuring approximately 50 feet by 18 feet with a nominal thickness of 4 inches over properly prepared and compacted subgrade. Slab will be reinforced with steel reinforcing bars (rebar) installed in accordance with local building codes.*

Provide a continuous 10-inch-wide by 10-inch-deep reinforced perimeter grade beam along the 50-foot side to support a future structural load. Grade beam to include appropriately sized and spaced reinforcing steel per code requirements.

Install a linear surface drain running parallel to the 50-foot edge of the slab. Drain to be connected to an approved discharge point and integrated with the existing irrigation/drainage system to ensure proper water management and prevent runoff toward the structure.

Work includes all excavation, base preparation, forming, reinforcement placement, concrete placement, finishing, curing, and site cleanup in accordance with applicable municipal codes and standards.

Construct a reinforced concrete sidewalk approximately 36 inches wide by 57 feet long (approximately 60 linear feet), extending from the backyard to the front of the property. The sidewalk will run parallel to the front garage wall.

Sidewalk to be approximately 4 inches thick over properly prepared and compacted subgrade and reinforced as required by local building codes. Work includes excavation, base preparation, forming, reinforcement placement, concrete placement, finishing, curing, and site cleanup.

Sidewalk will be graded to promote proper drainage away from the residence and adjoining structures and constructed in accordance with all applicable municipal codes and standards.

Owner: Nagaraja Shivashankar Applicant: Manjusha S			***0***	***$0.00***	***$75.00***	
Description:	*A bathroom is located directly above the patio, and the water pipes in that area are covered only with insulation and a thin layer of drywall. Due to increasingly harsh Dallas winters since 2021, we have experienced frozen and burst pipes almost every year around February and March.* *I consulted a few plumbers and electricians about this recurring issue. Based on their recommendations, we installed a heating coil around the section of pipe that is exposed to outdoor weather. The coil can be turned on during freezing temperatures to help prevent the pipe from freezing and bursting. A dedicated switch has been installed for safe and controlled operation.* *I have attached a few photos of the completed work, including the switch setup, for your reference. I have also added a related clause in the tenant lease agreement to document this installation and its intended use.*					
001077-2026-RMISC	**Residential Misc. - OTC Trade**	413 Mainsail Dr Allen, TX 75013 *112918*	Completed	*2/24/2026*	*8/23/2026*
